

Company Profile

 Urethane Giken Industry Co.,Ltd.

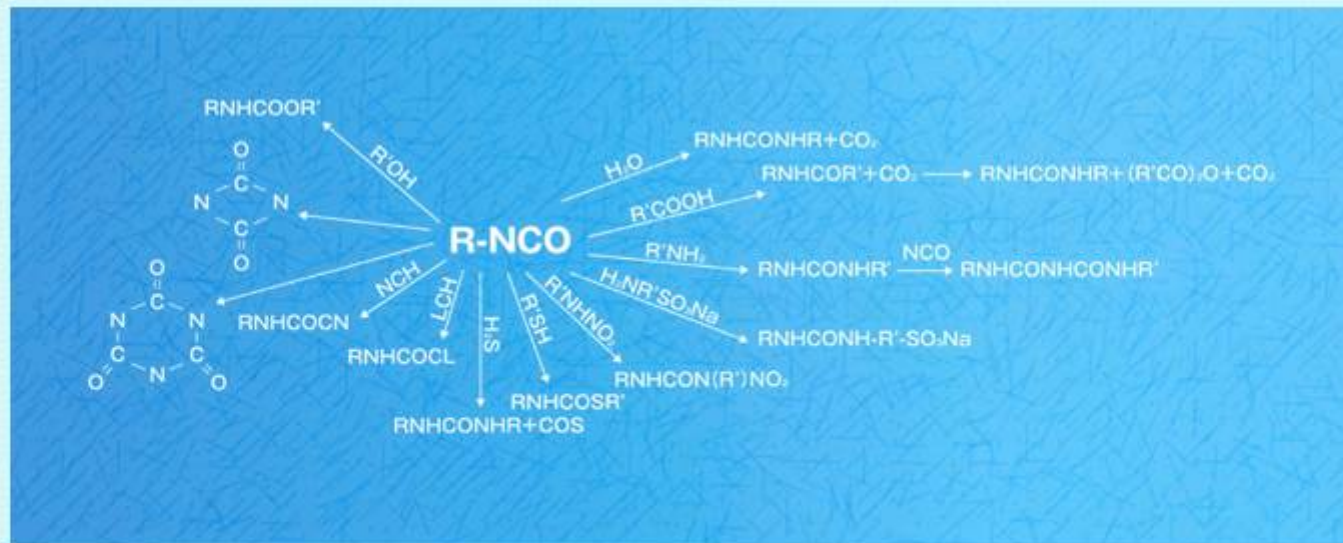

ウレタン技研工業株式会社

Introduction

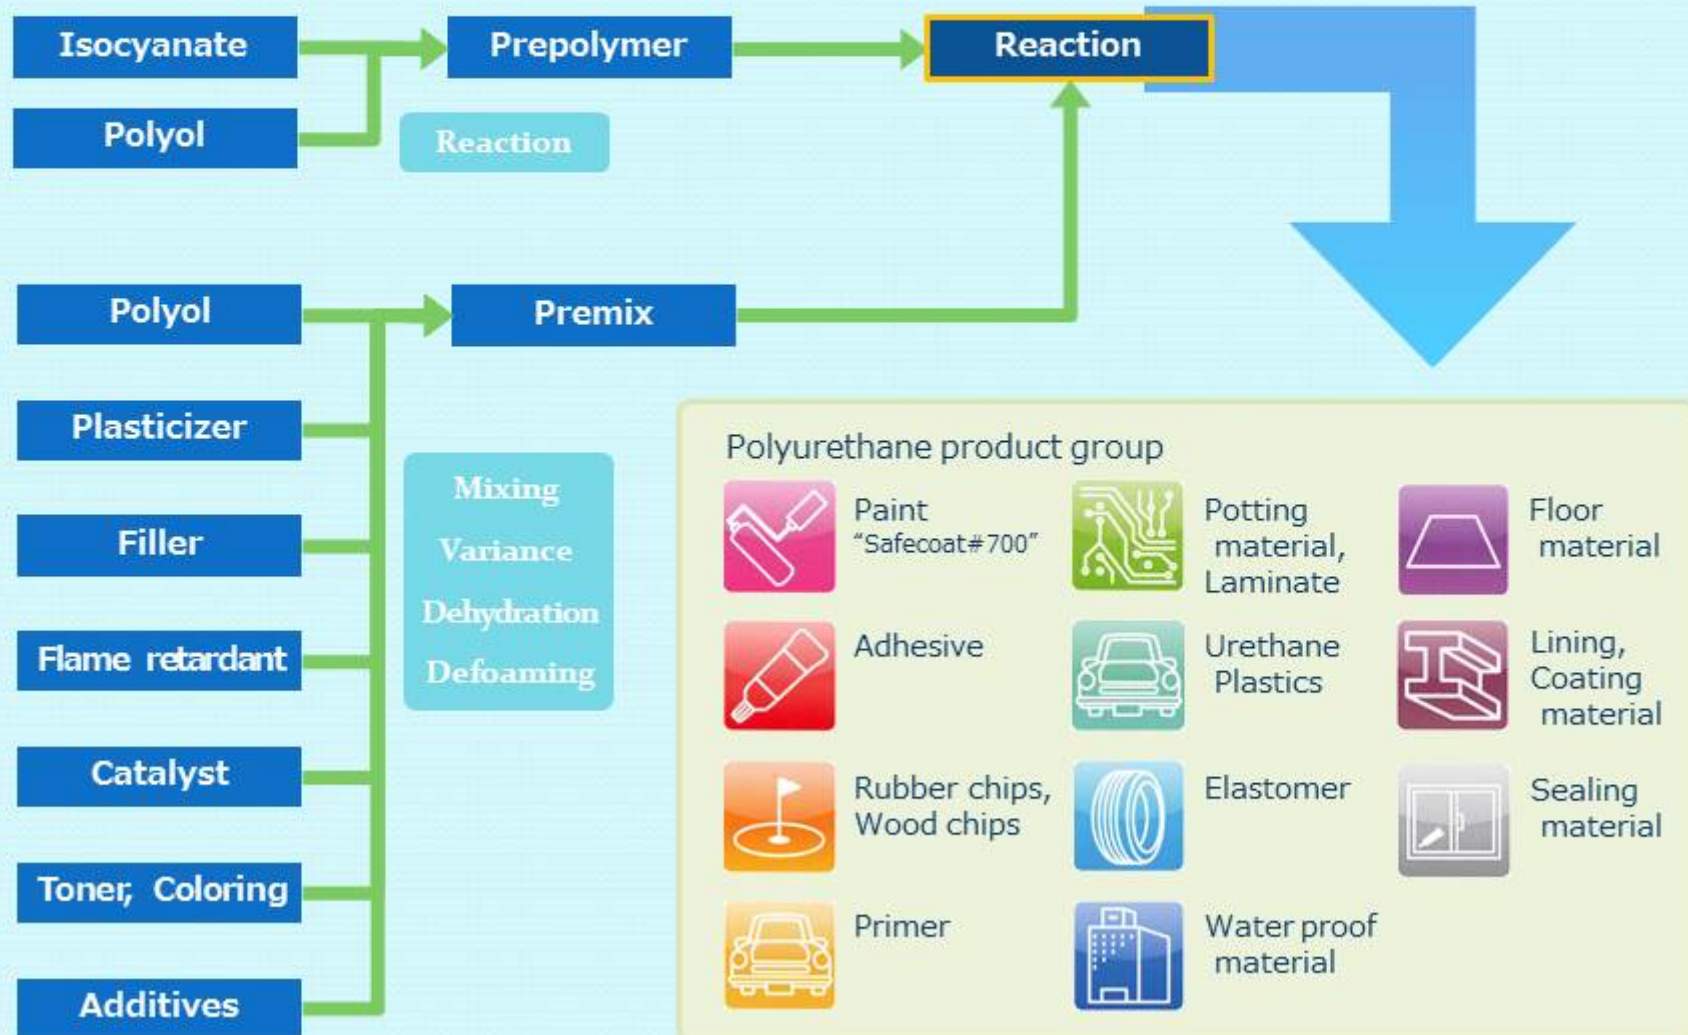

We aim to demand further possibility of polyurethane.

Since 1979, in pursuit of limitless possibility of research and development of polyurethane, we have been implementing research and development of usage as well as production and sales of polyurethane derivatives such as coating film floor materials, waterproof materials, adhesives, elastomer lining materials, primers and binders.

We are contributing to every field of industry with application technology development in order to offer excellent physical and chemical characteristics of polyurethane in various usages to the market as the basics.

Polyurethane manufacturing and product group

Company outline

<u>Company Name</u>	Urethane Giken Industry Co., Ltd.
<u>Location</u>	1-23 Amagasukashin-machi, Yokkaichi-City, Mie 510-8002, Japan Phone: +81-59-365-7125 Facsimile: +81-59-365-6265
<u>Foundation</u>	March, 1980
<u>Representative</u>	Koichiro Ishii
<u>Business Outline</u>	R&D, production/sales, test production and commissioned manufacturing concerning polyurethane

Plant and Equipment

Polyurethane synthesis reaction vessel

- 5000L
- 3000L × 2 units
- 1000L × 2 units
- 700L
- 500L × 2 unit

Synthesis reaction vessel for test production

- 100L
- 60L

Others

- Horizontal complete-seal explosion-proof line mixer × 3 units
- boiler equipment set
- cooling circulation equipment set
- 24KL washing tank
- 2KL heavy oil tank
- Forklift, R&D equipment, Analysis instruments

High viscosity kneader

- 700L dissolver
- 700L biaxial mixer
- 700L planetary mixer
- 700L ram press
